

Review and tailor the contents of this generic risk assessment to meet your school's individual circumstance. Actions determined as required but not yet in place should be moved from the 'What are you already doing?' column to the 'What further action is necessary?' column. You may also want to add specific actions relating to your school in this column. Record any other **significant** findings and actions required to reduce risk further where existing controls are insufficient, assigning these actions to an appropriate manager or member of staff.
